Octopus F270 IT Octopus F100/200/400/650 Octopus F IP-Netpackage Octopus F470 UC Octophon F620 HFA Operating Instructions

Important information

 For safety reasons, the telephone should only be supplied with power: using the original power supply unit. Part number: L30250-F600-C14x (x: 1=EU, 2=UK, 3=US) or in a LAN with PoE (Power over Ethernet), which complies with the IEEE 802.3af standard.
Never open the telephone or a key module. Should you encounter any problems, contact the responsible service personnel.
 Use only original accessories. The use of other accessories may be hazardous and will render the warranty, extended manufacturer's liability and the CE marking invalid.

Trademarks

()	The device conforms to the EU directive 1999/5/EC as attested by the CE marking.
X	All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.
	Proper disposal and separate collection of your old appliance will help prevent potential dam- age to the environment and human health. It is a prerequisite for reuse and recycling of used electrical and electronic equipment.
	For more detailed information about disposal of your old appliance, please contact your city office, waste disposal service, the shop where you purchased the product or your sales representative.
	The statements quoted above are only fully valid for equipment which is installed and sold in the countries of the European Union and is covered by the directive 2002/96/EC. Countries outside the European Union may impose other regulations regarding the disposal of electrical and electronic equipment.

Location of the telephone

- The telephone should be operated in a controlled environment with an ambient temperature between 5°C and 40°C.
- To ensure good speakerphone quality, the area in front of the microphone (front right) should be kept clear. The optimum speakerphone distance is 50 cm.
- Do not install the telephone in a room where large quantities of dust accumulate; this can considerably reduce the service life of the telephone.
- Do not expose the telephone to direct sunlight or any other source of heat, as this is liable to damage the electronic components and the plastic casing.
- Do not operate the telephone in damp environments, such as bathrooms.

Software update

During a software update, the phone must not be disconnected from the power supply unit, the LAN line or the phone line.

An update action is indicated by messages on the display and/or by flashing LEDs.

Documentation

These operating instructions can be found on CD-ROM (ask the service personnel) in HTML and PDF format.

To view or print the operating manual in PDF format, you need a computer on which the free Adobe Acrobat Reader program is installed.

To view the operating manual in HTML format, you need a computer with a Web browser, for example, Microsoft Internet Explorer.

General information

About this manual

This document contains general descriptions of the technical options, which may not always be available in individual cases. The respective features must therefore be individually defined in the terms of the contract.

If a particular function on your phone is not available to you, this may be due to one of the following reasons:

- The function is not configured for you or your telephone. Please contact your system support representative.
- Your communications platform does not feature this function. Please contact your sales partner for information on how to upgrade.

This user guide is intended to help you familiarize yourself with Octophon F620 and all of its functions. It contains important information on the safe and proper operation of your Octophon F620 phone. These instructions should be strictly complied with to avoid operating errors and ensure optimum use of your multifunctional telephone in the network.

These instructions should be read and followed by every person installing, operating or programming an Octophon F620 phone.

For your own protection, please read the section dealing with safety in detail. Follow the safety instructions carefully in order to avoid endangering yourself or other persons and to prevent damage to the unit.

This user guide is designed to be simple and easy to understand, providing clear step-bystep instructions for operating your Octophon F620 phone.

Administrative tasks are dealt with in a separate manual. The Quick Reference Guide contains quick and reliable explanations of frequently used functions.

Service

The service personnel can only help you if you experience problems or defects with the phone.

Should you have any questions regarding operation, your specialist retailer or network administrator will gladly help you.

For queries regarding connection of the telephone, please contact your network provider.

If you experience problems or defects with the phone, please dial the service number for your country.

Intended use

The Octophon F620 phone is a desktop or wall-mounted unit designed for speech transmission and for connection to the LAN. Any other use is regarded as unauthorized.

Telephone type

The identification details (exact product designation and serial number) of your telephone can be found on the nameplate on the underside of the base unit. Specific details concerning your communications platform can be obtained from your service technician. Please have this information ready when you contact our service department regarding faults or problems with the product.

Speakerphone quality and display legibility

- To ensure good speakerphone quality, the area in front of the microphone (front right) should be kept clear. The optimum speakerphone distance is 50 cm.
- Proceed as follows to optimize display legibility:
 - Turn the phone to tilt the display. This ensures you have a frontal view of the display while eliminating light reflexes.
 - Adjust the contrast as required \rightarrow Page 89.

Voice encryption

Your Octophon F620, software release 2 (V1 R2.xxxx) and later, supports voice encryption on Octopus F100/200/400/650/IP-Netpackage (R 4 and later) and Octopus F470 UC. This allows you to use your Octophon F620 to perform tap-proof calls. Voice transmission is encrypted and data is decrypted at the other call party's phone and vice versa.

If "Secure Mode" is enabled on your phone, and a connection is established to a phone that does not support voice encryption, the call is not encrypted and thus unsecured.

Your service personnel can define on the communications system whether you are notified of unencrypted calls and how. In idle mode you can view which security mode is acticated on your Octophon F620 \rightarrow Page 59.

Getting to know your Octophon F620 phone

The following sections describe the most frequently used operating elements and the displays on your Octophon F620 phone.

The user interface of your Octophon F620 HFA

- 1 You can make and receive calls as normal using the **handset**.
- 2 The **display** permits intuitive operation of the phone \rightarrow Page 17.
- 3 The **function keys** allow you to call up the most frequently used functions during a call (e.g. Disconnect) \rightarrow Page 14.
- 4 **⊡** mailbox key and **≥** menu key.
- 5 Audio keys are also available, allowing you to optimally configure the audio features on your telephone → Page 14.
- 6 The **3-way navigator** is a convenient navigation tool \rightarrow Page 15.
- 7 The **keypad** is provided for input of phone numbers/codes.

Ports on the underside of the phone PC 💻 Power supply unit 🕁 Network 봂 ----Local cable type 9 Handset -

Properties of your Octophon F620 HFA

Display type	LCD, 24 x 2 characters
Full-duplex speakerphone function	✓
10/100 Mbps Ethernet switch $ ightarrow$ Page 13	✓
Wall mounting	✓

Using network ports more efficiently

Octophon F620 HFA has a built-in 10/100 Mbps Ethernet switch. This means that you can connect a PC to the LAN directly via the phone. The telephone-PC connection option must first be activated on the telephone by service personnel.

Using this connection option saves one network port for each switch used and requires fewer or shorter network cables when arranged correctly.

Keys

Function keys

•-/~•	$\rightarrow \rightarrow$
Key	Function when key is pressed
•-/~•	End (disconnect) call \rightarrow Page 26.
$\rightarrow \rightarrow$	Redialing → Page 26.

□))	Turn speaker on/off (with red LED key) $ ightarrow$ Page 24.		
+	Increase volume and set contrast darker $ ightarrow$ Page 89.		

3-way navigator

Remove the protective film from the ring around the 3-way navigator before using the phone.

With this control, you can manage most of your phone's functions, as well as its displays.

Operation	Functions when key is pressed
Press the Okey.	In idle mode: • Open the idle menu → Page 17 In lists and menus: • Scroll down
Press the two key.	In idle mode: • Open the idle menu → Page 17 In lists and menus: • Scroll up
Press the 🞯 key.	Entry selected: • Perform action

Keypad

In cases where text input is possible, you can use the keypad to input text, punctuation and special characters in addition to the digits 0 to 9 and the hash and asterisk symbols. To do this, press the numerical keys repeatedly.

Example: To enter the letter "h", press the number **H**_{ghi} key on the keypad twice.

Alphabetic labeling of dial keys is also useful when entering vanity numbers (letters associated with the phone number's digits as indicated on the telephone spell a name, e.g. 0700 - PATTERN = 0700 - 7288376).

Multi-function keys

Function	*	#

Text input

Enter the required characters via the keypad.

Select the functions using the keys \odot and \bigcirc .

Confirm your entry with @.

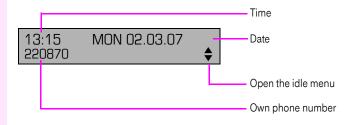

Display

Your Octophon F620 HFA comes with a tilt-and-swivel black-and-white LCD display. Adjust the tilt and contrast to suit your needs \rightarrow Page 89.

Idle mode

Your phone is in idle mode when there are no calls taking place or settings being made.

Example:

Idle menu

When in idle mode, press a key on the 3-way navigator \rightarrow Page 15 to display the idle menu. You can call up various functions here. The idle menu includes selected functions from the Program/Service menu \rightarrow Page 20.

It may contain the following entries:

- Caller list
- Forwarding on
- Lock phone
- DND on^[1]
- Advisory msg. on
- Ringer cutoff on
- Send message
- View sent message^[2]
- View callbacks^[3]
- Directory
- HF answerback on
- Suppress call ID
- Waiting tone off
- DISA intern

[2] Only appears when there are messages that the recipient has not yet viewed

[3] Only appears if callback requests are saved

^[1] Must be activated by service personnel.

Mailbox

Depending on the type and configuration of your communications platform (contact the relevant service personnel), messages from services such as Unified Messaging System (UMS) are displayed in this application in addition to messages received.

Messages

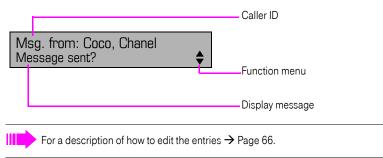

You can send short text messages to individual internal stations or groups.

In idle mode (\rightarrow Page 17) the following signals alert you to the presence of new messages:

- 🖾 key LED lights up
- Display "Messages received".

Press the mailbox key 🖾.

Example:

Voicemail

If your telephone is connected to a voicemail system (such as Entry Voice Mail), the Mailbox key will also light up to alert you to any messages that have arrived.

An appropriate message also appears on the display (for instance, in Entry Voice Mail: "<x> new messages").

To play back your voicemail, follow the instructions on the display.

Caller list

If you are unable to accept an external or internal call, the call attempt is stored in the caller list.

You can also store external calls that you have answered in the caller list (contact your service personnel).

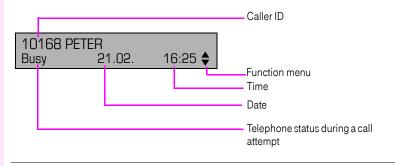

Your telephone stores up to ten calls in chronological order. Each call is assigned a time stamp. The most recent entry not yet answered in the list is displayed first. Multiple calls from the same caller do not automatically generate new entries in the caller list. Instead, only the most recent time stamp for this caller is updated and its number incremented.

The caller list is automatically displayed \rightarrow Page 17 in the idle menu \rightarrow Page 40.

Callers with suppressed numbers cannot be saved in the call log.

Information is displayed regarding the caller and the time at which the call was placed. Example:

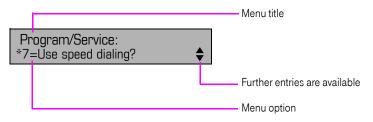

For a description of how to edit the call logs \rightarrow Page 40.

Program/Service menu

Use the E menu key to reach the Program/Service menu for your communication system.

The menu key LED remains red as long as you are in this menu.

Example:

A double arrow next to an entry indicates the availability of additional options for this entry. The menu structure comprises several levels. The first line in this structure shows the menu currently selected while the second line shows an option from this menu.

Accessing the menu

There are three ways to open the Program/Service menu on your communication system:

- 1. Press the menu key E≡. Use the o or keys to select an option and confirm with the keys key.
- 2. Press \bigcirc or \bigcirc and select a function from the idle menu \rightarrow Page 17.
- 3. In idle mode, press # or * and the code for the function you want.

For an overview of the maximum functions available, with corresponding codes, see \rightarrow Page 99.

Control and monitoring function

A control or monitoring function can be activated on your phone for service purposes by remote maintenance.

Control function

Service personnel have the option to activate and deactivate features of the phone via remote maintenance. During maintenance the handset, microphone, loudspeaker and headset are deactivated. You are additionally informed on the display that the control function is active.

Monitoring function

In order to detect malfunctioning of a phone for example, the service personnel install a monitoring function. You can use your phone as normal during monitoring. However you will first be informed about the operation with a message on the display and prompted to allow monitoring.

Basic functions

Please read the introductory chapter "Getting to know your Octophon F620 phone" → Page 11 carefully before performing any of the steps described here on your phone.

Answering a call

Special default ring signaling is set for your telephone:

- When you receive an internal call, your telephone rings once every four seconds (single-tone sequence).
- When you receive an external call, your telephone rings twice in rapid succession every four seconds (dual-tone sequence).
- When you receive a call from the entrance telephone, your telephone rings three times in rapid succession every four seconds (triple-tone sequence).
- If a call is waiting, you hear a short tone (beep) every six seconds.

Your service personnel can adjust the ring cadence for external and internal calls for you. In other words, different ring cadences can be set for different internal callers.

The number or the name of the caller appears on the display.

Answering a call via the handset

The phone is ringing. The caller appears on the screen. Pay attention to the notes on voice encryption \rightarrow Page 59.

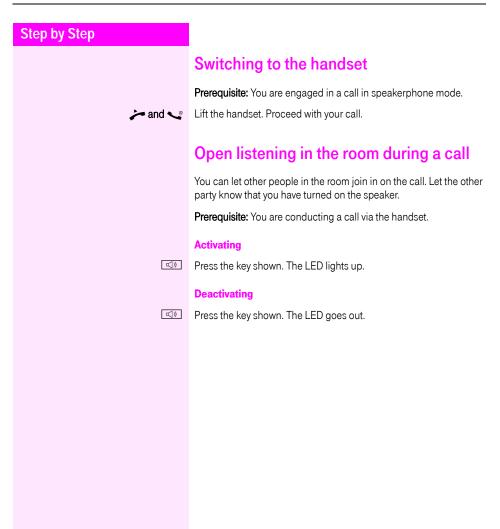

Lift the handset.

Raise or lower the volume. Keep pressing the key until the desired volume is set.

Step by Step Answering a call via the loudspeaker (speakerphone mode) Suggestions for using speakerphone mode: Tell the other party that you are using speakerphone mode. The speakerphone works bests at a low receiving volume. The ideal distance between the user and the telephone set in speakerphone mode is about 50 cm (approx. 20 inches). The phone is ringing. The caller appears on the screen. Pay attention to the notes on voice encryption \rightarrow Page 59. Press the key shown. The LED lights up. if nec. 🛨 or 🖃 Raise or lower the volume. Keep pressing the key until the desired volume is set. **Ending a call □**()) Press the key shown. The LED goes out. or Press the key shown. Switching to speakerphone mode Prerequisite: You are conducting a call via the handset. Hold down the key and replace the handset. Then release the key. if nec. + or -Set the call volume. Keep pressing the key until the desired volume is set. U.S. mode If the country setting is set to U.S. (ask the service personnel), you do not have to hold down the loudspeaker key when replacing the handset to switch to speakerphone mode. Press the key shown. Replace the handset. Proceed with your call. if nec. + or - Set the call volume. Keep pressing the key until the desired volume is set.

Making calls

Off-hook dialing

 Lift the handset.

Internal calls: Enter the station number. External calls: Enter the external code and the station number.

Pay attention to the notes on voice encryption \rightarrow Page 59.

The called party does not answer or is busy:

Replace the handset.

On-hook dialing

Internal calls: Enter the station number. External calls: Enter the external code and the station number.

The other party answers with speaker:

or On-hook dialing: Speakerphone mode.

Pay attention to the notes on voice encryption \rightarrow Page 59.

The called party does not answer or is busy:

□())

Press the key shown. The LED goes out.

Step by Step	
otch by otch	
	Redialing a number
	The last three external telephone numbers dialed are stored automatically.
	If this feature is configured (contact your service personnel), account codes entered are also saved \rightarrow Page 57.
	You can redial them simply by pressing a key.
	Displaying and dialing saved station numbers
$\rightarrow \rightarrow$	Press the key once to dial the number last dialed.
	Press the key twice to dial the next to the last number dialed.
	Press the key three times to dial the third-to-the-last number dialed.
or	
Next?	Keep confirming until the phone number you want appears.
Call?	Select and confirm the option shown.
	Pay attention to the notes on voice encryption \rightarrow Page 59.
	Ending a call
÷	Replace the handset.
or	
	Press the key shown.

Rejecting calls

You can reject calls which you do not wish to take. The call is then signaled at another definable telephone (contact your service personnel).

The phone is ringing. The caller appears on the screen.

•-/-•

Press the key shown.

If a call cannot be rejected, your telephone will continue to ring. The message "Currently not possible" is displayed (e.g. in the case of recalls).

Turning the microphone on and off

To prevent the other party from listening in while you consult with someone in your office, you can temporarily switch off the handset microphone or the handsfree microphone. You can also switch on the handsfree microphone to answer an announcement via the telephone speaker (speaker call, \rightarrow Page 36).

Prerequisite: A connection is set up, the microphone is activated.

Press the key shown. The LED lights up.

or

Press the lit key. The LED goes out.

Step by Step	
	Calling a second party (consultation)
	You can call a second party while a call is in progress. The first party is placed on hold.
Consultation?	Confirm.
<u> </u>	Call the second party.
	Pay attention to the notes on voice encryption $ ightarrow$ Page 59.
	Return to the first party:
Return to held call?	Confirm
or	
Quit and return?	select and confirm the option shown.
	Switching to the held party (alternating)
Toggle/Connect?	Select and confirm the option shown.
цц	Pay attention to the notes on voice encryption $ ightarrow$ Page 59.
	Combine the calling parties into a three-party conference
Conference?	Select and confirm the option shown.
	If voice encryption is not active or not available on a confer- ence party's phone, the entire conference is unsecured. If necessary, more information about unsecured connections is available here: → Page 59.
	Allowing call partners to continue a conference after you exit
Leave conference?	Select and confirm the option shown.
	For more information on conferences, see \rightarrow Page 51.

Consultation?

Transferring a call

If the person you are speaking to wants to talk to another colleague of yours, you can transfer the call that colleague.

Confirm.

1

or

Enter the number of the party to which you want to transfer the call.

- Announce the call, if necessary.
- Replace the handset.

Select and confirm the option shown.

Transfer?

Step by Step		
	Call forwarding	
	Using variable call forwarding	
	You can immediately forward internal or external calls to different in- ternal or external telephones (destinations). (External destinations re quire special configuration in the system.)	
	When call forwarding is active, a special dial tone sounds when you lift the handset.	
	If DID DTMF is active (contact your service personnel), you can also forward calls to this destination. Destinations: fax = 870, DID = 871, fax DID = 872.	
	The call forwarding key flashes if you are a call forwarding destination \rightarrow Page 14.	
	Special features must be taken into consideration if your tele- phone operates with Octopus F IP-Netpackage (system net- working via PC network) → Page 84!	
	Press the key shown.	
or	Open the idle menu \rightarrow Page 17.	
Forwarding on?	Select and confirm the option shown.	
1=all calls?	Confirm	
or		
2=external calls only?	select and confirm the option shown	
or		
3=internal calls only?	select and confirm the option shown.	
M	Enter the destination number.	
Save?	Confirm.	
	Deactivating call forwarding	
L.	Press the key shown.	
or		
Forwarding off	Select and confirm the option shown.	

Step by Step	
	Using call forwarding no reply (CFNR)
	Calls that are not answered after three rings (=default, can be adjust- ed by service personnel) or that are received while another call is on- going can be automatically forwarded to a specified telephone.
	Press the key shown.
*495=CFNR on?	Select and confirm the option shown.
8	 Enter the destination number. Enter the internal station number for internal destinations Enter the external code and the external station number for external destinations
Save?	Confirm.
	Deactivating call forwarding no reply
)	Press the key shown.
#495=CFNR off?	Select and confirm the option shown.
Delete?	Confirm.
or	
Exit	Select and confirm to deactivate but not delete the forwarding destination.
	If CFNR is activated, when you hang up, "CFNR to:" appears briefly on the display.

Step by Step	
	Call forwarding in the event of telephone failure (CFSS)
	If configured (consult your service personnel), you can define an in- ternal or external call forwarding destination that activates in the event of telephone failure.
Ē	Press the key shown.
*9411= CFSS on?	Select and confirm the option shown.
	Enter the destination number.
Save?	Confirm.
	Deactivating call forwarding/deleting a destination:
Ē	Press the key shown.
#9411= CFSS off?	Select and confirm the option shown.
Delete?	Confirm the option shown to deactivate and delete the forwarding destination.
or	
Exit?	Select and confirm to deactivate but not delete the forwarding destination.
	Changing the forwarding destination (if call forwarding is active):
	Press the key shown.
	Enter the code.
Change?	Confirm.
	Change the destination phone number.
Save?	Confirm.

Step by Step	
Step by Step	
	Call forwarding in the carrier network and forwarding multiple subscriber numbers (MSN)
	If this function has been configured (contact your service personnel), you can forward calls to your assigned multiple subscriber number (MSN) (DID number) directly within the carrier network. For example, you can forward your phone line to your home phone af- ter business hours.
Ē	Press the key shown.
Trunk FWD on?	Select and confirm the option shown.
1=immediate?	Select and confirm the required type of call forwarding
2=on no answer?	select and confirm the option shown
3=on busy?	select and confirm the option shown. Enter your DID number. Enter the destination number (without the external code).
Save?	Confirm.
	Deactivating call forwarding
Trunk FWD off?	Select and confirm the option shown.
	Confirm the displayed call forwarding type. Enter your DID number.

Step by Step	
	Using callback
	 You can request a callback if the internal station called is busy or if nobody answers. This also applies for external calls via ISDN exchanges. This feature saves you from having to make repeated attempts to reach the user. You receive a callback When the other party is no longer busy, When the user who did not answer has conducted another call.
	When configured (contact your service personnel), all call- back requests are automatically deleted over night.
	Storing a callback
	Prerequisite: You have reached a busy line or no one answers.
Callback?	Confirm.
	Accepting a callback
	Prerequisite: A callback was saved. Your telephone rings. "Callback:" appears on the display.
4	Lift the handset.
or ব্যে»]	Press the key shown. The LED lights up.
or Answer?	Select and confirm the option shown.
	You hear a ring tone.
	Pay attention to the notes on voice encryption \rightarrow Page 59.

Step by Step	
	Viewing and deleting a stored callback

or Exit?	select and confirm the option shown.
	Talking to your colleague with a speaker call
	You can make a loudspeaker announcement through a loudspeaker if connected (ask your service personnel), or to an internal user with a system telephone without any action on their part.
$\overline{\mathbf{O}}$	Open the idle menu → Page 17.
*80=Speaker call?	Select and confirm the option shown.
U.	Enter the station number.
	Responding to a speaker call \rightarrow Page 36.

Step by Step	
	Talking to your colleague with discreet calling
	If this function has been configured (ask your service personnel), you can join an ongoing call conducted by an internal user at a system telephone with display. You can listen in unnoticed and speak to the internal user without be ing overheard by the other party (discreet calling).
7	Lift the handset.
+ Swxyz 4 ghi 5 jkl	Enter the code.
8	Enter your internal station number.
	Your service personnel can protect your telephone against discreet calling.
	Automatic connection setup (hotline)
	If this function is configured (contact your service personnel), the sys tem automatically sets up a connection to a preset internal or external destination.
~	Lift the handset. Depending on the setting, the connection is either set up immediate ly or only after a preset period of time (hotline after a timeout).
	Assigning a station number
	If this function has been configured (contact your service personnel) you can selectively assign a specific number (DID number) to your telephone before making an external call. The assigned number ther appears on the called party's display.
	Press the key shown.
*41=Temporary MSN?	Select and confirm the option shown.
	Enter the DID number you wish to use.
Ū	Dial the external number.

Associated dialing/dialing aid

If this function has been configured (contact your service personnel), you can use a dialing aid to dial numbers and set up calls for your telephone.

The operating procedure depends on whether the dialing aid is connected to the $S_0\,bus$ or the a/b (T/R) port.

You can also use your system telephone as a dialing aid for other telephones.

Dialing aid on the S0 bus

On the PC, select a destination and start dialing.

The speaker on your telephone is switched on. Lift the handset when the other party answers.

Dialing aid at the a/b (T/R) port

On the PC, select a destination and start dialing.

"Lift the handset" appears on the PC screen.

Lift the handset.

Dialing aid from your telephone for another telephone:

1

μ.

Press the key shown.

Select and confirm the option shown.

Enter the internal station number ("Dial for:").

Enter the number you wish to dial.

Step by Step	
	During a call
	Using call waiting (second call)
	Callers can still reach you while you are engaged in another call. A signal alerts you to the waiting call. You can ignore or accept the second call. When you accept the waiting call, you can either end the first call or place it on hold and resume the call later on. You can block the second call or the signal tone (\rightarrow Page 49).
	Prerequisite: You are engaged in a phone call and hear a tone (every six seconds).
	Ending the first call and answering the waiting call:
÷	Replace the handset. Your telephone rings. Pay attention to the notes on voice encryption \rightarrow Page 59.
~	Answer the second call. Lift the handset.
	Placing the first call on hold and answering the second call:
Call waiting?	Select and confirm the option shown. Pay attention to the notes on voice encryption \rightarrow Page 59.
	You are immediately connected to the second caller. The first party is placed on hold.
	Ending the second call and resuming the first one
Quit and return?	Confirm.
or	
Ŷ	Replace the handset. "Recall" appears on the display.
<i>مر</i>	Lift the handset.

	I
Step by Step	
	Preventing and allowing call waiting
	(automatic camp-on)
	If this function has been configured (ask your service personnel), you can prevent or allow a second call \rightarrow Page 48 from being signaled by automatic camp-on during an ongoing call.
Ē	Press the key shown.
#490=Call wait.trm.off?	Select and confirm the option shown ^[1] ,
or	
*490=Call wait.term.on?	select and confirm the option shown.
	Turning the call waiting tone on and off
	You can suppress the call waiting tone (every six seconds) for exter- nal calls. A one-time special dial tone then alerts you to the waiting call.
	Activating
\odot	Open the idle menu → Page 17.
Waiting tone off?	Select and confirm the option shown.
	Deactivating
	Open the idle menu → Page 17.
Waiting tone on?	Select and confirm the option shown.
	Saving a number
	You can save your call partner's station number for subsequent redialing from the caller list \rightarrow Page 40.
	Prerequisite: You are conducting a call.
Save number?	Select and confirm the option shown.

Step by Step	
	Parking a call
	You can park up to ten calls, either internal, external, or both. Parked calls can be displayed on and picked up from another telephone. This feature is useful if you want to continue a call at another phone.
	Prerequisite: You are conducting a call.
) <u>=</u>	Press the key shown.
*56=Park a call?	Select and confirm the option shown.
	Enter the number of the park slot (0 - 9) and make a note of it. If the park slot number you entered is not displayed, it is already in use; enter another one.
	Retrieving a parked call
	Prerequisite: One or more calls have been parked. The phone is idle.
Ē	Press the key shown.
Retrieve call?	Select and confirm the option shown.
[] +] (9wxy)	Enter the park slot number you noted earlier. If the park slot number you enter is not in use, you cannot retrieve the call.
	If a parked call is not picked up, after a specific period of time the call is returned to the telephone from where it was parked (recall).

	•
Step by Step	
	Conducting a conference
	In a conference call, you can talk to as many as four other parties a the same time. These may be internal or external users.
	You can only add parties to or remove them from a conference if you initiated the conference.
	Call the first party.
Start conference?	Select and confirm the option shown.
	Call the second party. Announce the conference.
Conference?	Select and confirm the option shown.
	A tone sounds every 30 seconds to indicate that a conference is in progress.
	If voice encryption is not active or not available on a conference party's phone, the entire conference is unsecured. If necessary, more information about unsecured connection is available here: → Page 59.
	If the second party does not answer
Return to held call?	Confirm.
	Adding up to five parties to a conference
Add party?	Confirm.
/	Call the new party. Announce the conference.
Conference?	Select and confirm the option shown.
	Viewing the conference parties
View conf parties?	Select and confirm the option shown. The first party is displayed.
Next?	To display other parties, confirm each subsequent display.
Exit list?	To exit the list: Select and confirm the option shown.

Step by Step	
otch by otch	
	Removing parties from the conference
View conf parties?	Select and confirm the option shown. The first party is displayed.
Next?	Confirm as often as required until the desired party appears.
Remove party?	Select and confirm the option shown.
	If a participant that was connected to the conference via an unencrypted line leaves, the conference remains unsecured.
	Leaving a conference
Leave conference?	Select and confirm the option shown.
or	Replace the handset, if this feature is configured (contact your service personnel).
	Ending a conference
End conference?	Select and confirm the option shown.
or	
÷	Replace the handset, if this feature is configured (contact your service personnel).
	Removing the ISDN central office party from the conference
Drop last conf. party?	Select and confirm the option shown.
	Activating tone dialing/DTMF suffix-dialing
	You can transmit dual-tone multifrequency (DTMF) signals to control devices such as an answering machine or automatic information system.
Ē	Press the key shown.
*53=DTMF dialing?	Select and confirm the option shown.
8	You can use the keys \Box + through \blacksquare \blacksquare and \blacksquare to transmit DTMF signals.
	Ending the call also deactivates DTMF suffix dialing. Your system may be configured so that you can start DTMF suffix-dialing immediately after setting up a connection.

Step by Step	
	Transferring a call after a speaker call
	announcement in a group
	If this function has been configured (contact your service personnel you can use a speaker call (announcement, \rightarrow Page 78) to announce a call in progress to a group of users \rightarrow Page 45. After a member of the group has accepted the call request, you can transfer the waiting party.
	Prerequisite: You are conducting a call.
Consultation?	Confirm. The other party is placed on hold.
$\widehat{\mathbf{O}}$	Press the key shown.
*80=Speaker call?	Select and confirm the option shown.
	Enter the group's station number.
~	Announce the call. When a member of the group accepts the call \rightarrow Page 36, you are connected to this party.
÷	Replace the handset.
or	
Transfer?	Select and confirm the option shown.
	If the connection between the two other parties is not estab- lished within 45 seconds, the call from the first part returns to you (recall).
	Sending a trunk flash
	To activate ISDN-type services and features through the network carrier's analog trunks or those of other communications platforms (such as "consultation hold"), you must send a signal to the trunks be fore dialing the service code or telephone number.
	Prerequisite: You have set up an external connection.
Ē	Press the key shown.
*51=Trunk flash?	Select and confirm the option shown.
l III	Enter the service code and/or telephone number.

Step by Step	
	If you cannot reach a destination
	Call waiting (camp-on)
	Prerequisite: You have dialed an internal number and hear a busy signal. It is important that you reach the called party.
Camp-on	Wait (approx. 5 seconds) until "Camp-on" appears on the display and the busy tone is followed by the ring tone.
	The called party can then respond \rightarrow Page 48.
	The called party can prevent automatic call waiting \rightarrow Page 49.
	If this feature is configured (contact your service personnel), you will hear the ring tone and the message "Camp-on" is im- mediately displayed.
	Busy override – joining a call in progress
	This function is only available if it has been configured by the service technician (contact your service personnel).
	Prerequisite: You have dialed an internal number and hear a busy signal. It is important that you reach the called party.
Override?	Select and confirm the option shown.
	The called party and person to whom this party is talking hear an alerting tone every two seconds. If the called party has a system telephone with display, the following appears on the screen: "Override: (Number or name)".
	You can now start talking.

Step by Step	
	Using night answer
	When night answer mode is active, for example during a lunch break or after office hours, all external calls are immediately forwarded to a specific internal telephone (night station). The night station can be defined by service personnel (standard night answer service) or by you (temporary night answer service).
	Special features must be taken into consideration if your tele- phone operates with Octopus F IP-Netpackage (system net- working via PC network) → Page 85!
	Activating
Night answer on?	Select and confirm the option shown.
*=default?	Press the "OK" dialog key to confirm (standard night answer service).
or × or	Enter the code (standard night answer service).
U.	Enter the destination number (temporary night answer service).
Save?	Confirm.
	Deactivating
Night answer off?	Select and confirm the option shown.
	Corrigo personnal con alco configure en "eutomatic night enquer cor

Service personnel can also configure an "automatic night answer service". The automatic night answer service activates at specific times for your telephone depending on how it is programmed. You can deactivate the automatic night answer service or replace it with a night answer service you configured (see above).

Displaying and assigning call charges

Displaying call charges

For the current call:

Call charges are shown by default on the display when a call ends. If you want to display call charges as they occur during a chargeable call, your service personnel must request this option from the network operator.

Call charge display must be requested from the network operator and configured by the relevant service personnel.

Depending on the setting, call charges are displayed during or after a call.

Depending on the network operator, free external calls are also displayed. The message "Free of Charge" appears on the screen either before or during the call.

If the cost indication facility has not been installed, the display will show the dialed number and/or the length of the telephone call.

[**`**≣

If a call is forwarded, call charges are assigned to the destination of the call transfer operation.

For all calls and for the last call

Connection charges for the last chargeable call made are displayed first. After five seconds, the accumulated connection charge (total) is displayed.

Press the key shown.

Select and confirm the option shown.

*65=Show call charges?

	1,7,5, 5,5, 5,5
Step by Step	
	Dialing with call charge assignment
	You can assign external calls to certain projects.
	Prerequisite: Your service personnel have defined account codes for you.
Ē	Press the key shown.
*60=Account code?	Select and confirm the option shown.
	Enter the account code.
if nec. 🗯	Press this key.
or	
#=Save?	Confirm.
	May be necessary, depending on configuration; contact your service personnel.
8	Enter the external phone number.
	You can also enter the account code during a call.

Step by Step	
	Privacy/security
	Voice encryption
	Please see also the explanations on \rightarrow Page 10.
	Displaying status
	in call mode
	During calls, you can check if your call is secure.
Security Call Status	Select the option shown.
Secure Call	The call is secure.
or

	in idle mode
	You can see whether voice encryption is active on your phone from the display, when the phone is in idle mode.
Security status	Select the option shown.
Secure client	Voice encryption is activated for your telephone.
or	
Standard client	Voice encryption is not activated for your telephone.

	Thvacy/security
Step by Step	
	Notes on voice encryption
	Notes on voice encryption
	Your service personnel can define on the communications system whether you are notified of encrypted or unencrypted calls and how. You receive a notification (on-screen or a warning tone) if you answer a call or a callback call or of you are added to a conference.
1	Warning tone.
and/or	
Standard Call	Display for unencrypted call.
or	
Secure Call	Display for apprinted cell
Secure Call	Display for encrypted call.
	Turning ringer cutoff on and off
	If you do not wish to take calls, you can activate the ringer cutoff func- tion. Calls are only identified by one ring signal, and they are shown on the display.
	Activating
	Open the idle menu \rightarrow Page 17.
Ringer cutoff on?	Select and confirm the option shown.
	ocicit and commune option shown.
	Deactivating
\bigcirc	Open the idle menu \rightarrow Page 17.
Ringer cutoff off?	Select and confirm the option shown.

Step by Step	
	Activating/deactivating "Do not disturb"
	If you do not wish to take calls, you can activate do not disturb. Inter nal callers hear the busy tone, external callers are connected to an- other phone, which you can specify (contact your service personnel)
	Activating
\odot	Open the idle menu \rightarrow Page 17.
DND on?	Select and confirm the option shown.
	Deactivating
\odot	Open the idle menu \rightarrow Page 17.
DND off?	Confirm.
	When you lift the handset, you will hear a special tone (con- tinuous buzzing) reminding you that "Do not disturb" is acti- vated.
	Authorized internal callers automatically override the DND feature after five seconds.
	Caller ID suppression
	You can prevent your station number or name from appearing on the displays of external parties you call. The feature remains active until you deactivate it.
	Activating
\odot	Open the idle menu \rightarrow Page 17.
Suppress call ID?	Select and confirm the option shown.
	Deactivating

Select and confirm the option shown.

Your service personnel can activate/deactivate caller ID suppression for all phones.

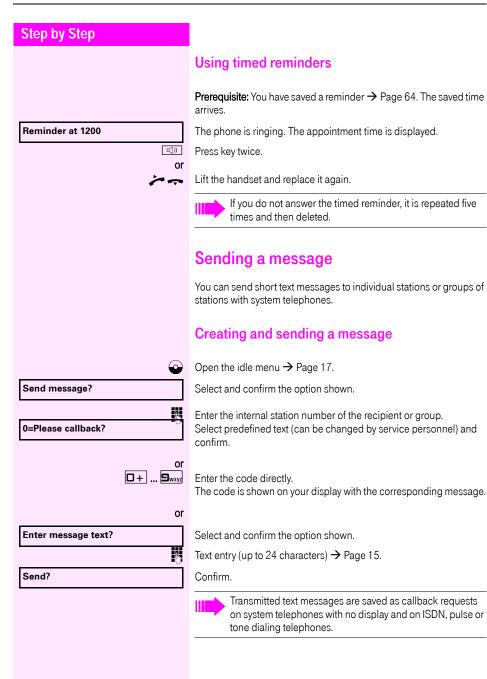

Restore caller ID?

Step by Step	
	Monitoring a room
	You can use a phone to monitor a room. This function must be en- abled on the monitoring phone. When you call this phone, you can immediately hear what is happen- ing in that room.
	Activating the telephone to be monitored
Ē	Press the key shown.
*88=Room monitor?	Select and confirm the option shown.
	You can either leave the telephone in speakerphone mode or lift the handset and leave it directed towards the noise source.
	Deactivating the telephone to be monitored
Ē	Press the lit key. The LED goes out.
or	
÷	Replace the handset.
	Monitoring the room
U	Enter the internal station number of the phone located in the room that you wish to monitor.
	Trace call: identifying anonymous callers
	You can identify malicious external callers. You can record the call- er's phone number during a call or up to 30 seconds after a call. In this case, you should not hang up.
Ē	Press the key shown.
*84=Trace call?	Select and confirm the option shown.
	If the trace is successful, the transmitted data is stored by your network operator. Contact your service personnel.

Step by Step	
	Locking the telephone to prevent
	unauthorized use
	You can prevent unauthorized parties from using your phone during your absence.
	Locking the phone
#	Hold down the key shown.
or	
•	Open the idle menu \rightarrow Page 17.
Lock phone?	Select and confirm the option shown.
8	Enter code (telephone lock) \rightarrow Page 63.
	When the phone is locked, a special dial tone sounds when the handset is lifted. Within the system, users can make calls as normal.
	Your phone can also be locked or unlocked by an authorized party \rightarrow Page 63.
	Unlocking the phone
#	Hold down the key shown.
or	
\odot	Open the idle menu → Page 17.
Unlock phone	Select and confirm the option shown.
U.	Enter code (telephone lock) \rightarrow Page 63.

Step by Step	
	Locking another telephone to prevent
	unauthorized use
	If configured (contact your service personnel), you can lock and un- lock other telephones to prevent unauthorized access.
	If a phone user locks his or her phone and forgets the personal lock code, you can use this function to unlock the phone.
=	Press the key shown.
*943=Lock all phones?	Select and confirm the option shown.
IJ	Enter the internal station number of the phone you wish to lock/unlock.
*=lock phone?	Confirm
or

Change PIN?	If the other user has not set a PIN, he or she is prompted to do so on his or her phone.
	Dial the external number.
	This state is canceled as soon as the call is ended.

Using a mobile phone number at a
random phone

You can program a mobile phone number that was set up especially for you by your service personnel at a system-based Octophon F620 phone of your choice. The original "guest telephone" setting is deactivated. The mobile phone number remains available until you log off the "guest telephone".

Logging on to the "guest telephone"

Log on to the "guest telephone" with a mobile phone number.

Prerequisite: You received a mobile phone number and, where applicable, a password (consult your service personnel).

Enter the code for "Mobile Login (log on)" (see \rightarrow Page 99). The request "New number" is output.

Enter the mobile phone number.

Enter your password.

Press the key shown.

Confirm.

μ.

if nec. 📕

#

or

The logon procedure starts.

Your mobile phone number will appear on the left of the display when you are correctly logged on \rightarrow Page 17.

Moving the connection to the next telephone

If you want to move your connection from the first "guest telephone" to a second "guest telephone", log onto the second "guest telephone" in the usual fashion (see \rightarrow Page 69).

The message "Log off successful" is output on the first "guest telephone". The "home telephone" remains locked. You can now use the second "guest telephone" in the same way as the first one.

Logging off the "guest telephone"

14

Press the "Mobile Login" key.

Enter the code for "Mobile Login (log off)" (see \rightarrow Page 99). Logging off is initiated.

The "guest phone" is now available with its original phone number, properties and functions.

Entry complete

Step by Step	
	Resetting services and functions (system-wide cancellation for a telephone)
	A general reset procedure is available for initiated functions. The fol- lowing functions are deleted, if enabled:
	 Forwarding on Advisory msg. on Ringing group on Hunt group off Suppress call ID Call waiting tone off Do not disturb on Ringer cutoff on Received messages: View callbacks
<u> </u>	Press the key shown.
#0=Reset services?	Select and confirm the option shown ^[1] .

Activating functions for another telephone

If configured (contact your service personnel), you can activate and deactivate the following functions for other phones (associated service):

- Do not disturb, code: +97/#97 → Page 60
- Call forwarding, code +11, +12, +13/#1 → Page 30
- Lock and unlock phone, code *66/#66 → Page 62
- Ringing group, code *81/#81 → Page 78
- Leave an advisory message, code ★69/#69 → Page 67
- Group call, code *85/#85 → Page 78
- Reset services and functions, code #0 → Page 70
- Control relays, code *90/#90 → Page 76
- Night answer, code *44/#44 → Page 55
- Timed reminders, code *46/#46 → Page 64

Press the key shown.

Confirm.

Enter the internal station number of the phone where you wish to activate the function.

μ.

Enter code (for example, *97 for "Do not disturb on").

For any additional input, follow the instructions on your display.

*83=Associated serv?

Using system functions from outside DISA (direct inward system access)

If configured (contact your service personnel), you can use an external phone like an internal station to set up an outgoing external connection via the system. You can also activate or deactivate the following system functions:

- Reset services and functions, code #0 → Page 70
- Call forwarding, code *1/#1 → Page 30
- Lock and unlock phone, code ★66/#66 → Page 62
- Save your PIN, code *93 → Page 63
- Send a message, code *68/#68 → Page 65
- Leave an advisory message, code *69/#69 → Page 67
- Ringing group, code *81/#81 → Page 78
- Group call, code *85/#85 → Page 78
- Caller ID suppression, code *86/#86 → Page 60
- Camp-on tone, code +87/#87 → Page 49
- Open door, code $*61 \rightarrow$ Page 37
- Release door opener, code *89/#89 → Page 38

Step by Step	
	Controlling connected computers/
	programs/telephone data service
	If this function has been configured (contact your service personnel), you can control connected computers or programs running on them, such as hotel services or information systems, from your telephone.
	Prerequisite: You have set up a connection.
Ē	Press the key shown.
*42=Tel. data service?	Confirm.
	For entering data, you are guided by the connected computer. How- ever, depending on configuration (contact your service personnel), you must activate your entries in one of the following ways:
	Inputs in en-bloc mode:
	Enter data.
#	Complete entry.
or	
Entry complete?	Confirm.
or	Inputs in online mode:
	The connected computer processes your entries directly.
#	Enter the code.
0 + 9 wxyz	Enter data.

Communicating with PC applications over a CSTA interface

If configured (contact your service personnel), you can use your phone to communicate with PC applications (CSTA = Computer Supported Telecommunications Applications). You send information to the application and receive information from the application, for example, via your phone display.

(★) 4 ghi Swxyz 4 ghi E

Enter the code.

Enter the three-digit ID for the application you wish to control.

Use the relevant keys to communicate with the application.

Ending communication with the application

Select and confirm the relevant CSTA message.

or

Lift the handset and replace it again.

*90=Control Relay On?

#90=Control Relay Off?

Step by Step

Controlling relays (only for Octopus F100/200/400/650)

If this function has been configured (contact your service personnel), you can use up to four relays to enable/disable different devices (such as a door opener).

Depending on how you program the relays, you can activate and deactivate them manually them or configure them to activate and deactivate automatically (after timeout).

Special features must be taken into consideration if your telephone operates with Octopus F IP-Netpackage (system networking via PC network) → Page 87!

Select and confirm the option shown

select and confirm the option shown.

1 ت ... 4 _{ghi}

or

Enter the relay.

Sensors (Octopus F100/200/400 only)

If configured (contact your service personnel), sensors are able to recognize signals, call your phone, and display an appropriate message on the screen.

Radio paging

If radio paging equipment (PSE) is connected to your system (contact your service personnel), you can locate people via their pocket receivers.

Pocket receivers signal a call request to the person you want to page. This person can then answer the page at the nearest phone.

Paging persons

To ensure that you can be found, you must have enabled a ringing group \rightarrow Page 80, call forwarding \rightarrow Page 30 or call forwarding-no answer (service technician) to the internal station number of your PSE.

A call request is signaled automatically.

Answering the page from the nearest telephone

Lift the handset. Enter the code.

Enter own station number.

Using team functions

If configured (consult your service personnel), your telephone is part of a team. The team consists of internal phones that are able to use certain functions.

Activating/deactivating a group call

Special features must be taken into consideration if your telephone operates with Octopus F IP-Netpackage (system networking via PC network) \rightarrow Page 83!

If configured (consult your service personnel), you belong to one or more groups of stations, which can be reached via hunt group or group call station numbers.

Incoming calls are signaled one after the other (= hunt group) or simultaneously (= group call) on all phones in the group, until a group member answers the call.

Each station in the group can still be reached via their personal station number.

You can activate and deactivate the audible signal for a hunt group, group call or individual trunks in a group.

You are part of a hunt group or call group

Open the idle menu \rightarrow Page 17.

Troubleshooting

Pressed key does not respond:

Check if the key is stuck.

Telephone does not ring:

Check whether the "Do not disturb" function is activated on your telephone (\rightarrow Page 60). If so, deactivate it.

You cannot dial an external number:

Check whether your telephone is locked. If the phone is locked, enter your PIN to unlock it \rightarrow Page 62.

To correct any other problems:

First contact the relevant service personnel. If the service personnel are unable to correct the problem, they must contact Customer Service.

Caring for your telephone

- Never allow the telephone to come into contact with coloring, oily or aggressive agents.
- Always use a damp or antistatic cloth to clean the telephone. Never use a dry cloth.
- If the telephone is very dirty, clean it with a diluted neutral cleaner containing surfactants, such as a dish detergent. Afterwards remove all traces of the cleaner with a damp cloth (using water only).
- Never use aggressive or alcohol-based cleansers on plastic parts. The use of scouring agents is also forbidden.
